

The background features abstract, flowing red and white lines that create a sense of movement and depth. The red lines are thick and vibrant, while the white lines are thin and delicate, weaving through the red shapes.

THE WFH ANNUAL GLOBAL SURVEY 2021 exercise

The Report on the Annual Global Survey 2021 shows an international snapshot of rare bleeding disorder patient identification and access to care.

Each year questionnaire is sent to NMOs linked with the WFH with the request that they in turn work with physicians or health officials, as necessary, to complete the survey.

Since 2020 there is a table devoted to the use of VWD products. In 2021 only 55 countries out of 118 provided data on VWD products.

The background features abstract, flowing lines in shades of red and white, creating a sense of movement and elegance. The lines are smooth and curved, with some areas showing a gradient from light to dark red. The overall composition is clean and modern.
